

GEOGRAPHY AT ALCONBURY

At Alconbury Primary School, we encourage our children to make sense of their own surroundings and take pride in the village we live in. We ask geographical questions and develop specific geographical skills, which are progressive and built upon each year.

We inspire our children to think about their own place in the world and develop a sense of responsibility towards the environment and an understanding of the human impact on the natural world. Where possible we complete practical field work and we strive to complete this field work in our local area. We update planning to reflect changes both worldwide, nationally and locally to ensure knowledge is relevant and current.

We invite visitors, who have had first-hand experience of the world, to share their experiences with our children so that their expertise and knowledge can be utilised.
